NEWS RELEASE - 28/06/2005

A HIGH TECH APPROACH TO LEARNING

Fosters Bakery has been part of the team that have developed the "BITE" interactive learning tool for the baking industry. The product comprises a comprehensive course on baking covering all aspects of craft and plant baking. John Foster: "There are loads of training resources on health & safety and food hygiene. What was missing was the material to train people in the basics of baking technology. With this resource we effectively provide that missing ingredient. By completing these 3 modules (food safety, health & safety and baking) it provides a passport into the baking industry" .

Details on the BITE CD learning tool are available from Teamfood, 2 Grimston Grange, Sherburn Road Tadcaster LS24 9BX. 01937 838891
