Nuts Policy

Fosters Bakery operates good manufacturing practices in accordance with the "BRC" Global Food Standard Issue 5 and the SALSA food safety system. These procedures include allergen controls.

We produce products containing almonds. These include almond bakewell tarts and other items of flour confectionery. These are made in our confectionery department and packed as finished products on our flow-line wrapping equipment; thereafter the nut products are wrapped in sealed packaging.

We do not handle nuts on our morning goods baking equipment but nut products (bakewell tarts) are packed on the same wrapping equipment.

We do not handle any nuts on our bread (sliced bread) baking or bagging equipment.

We do not handle peanuts or products containing peanuts at all in our bakery.

We place a general warning on all our products that the bakery handles nuts.

John Foster
Managing Director
